

How to Use Facebook Graphics

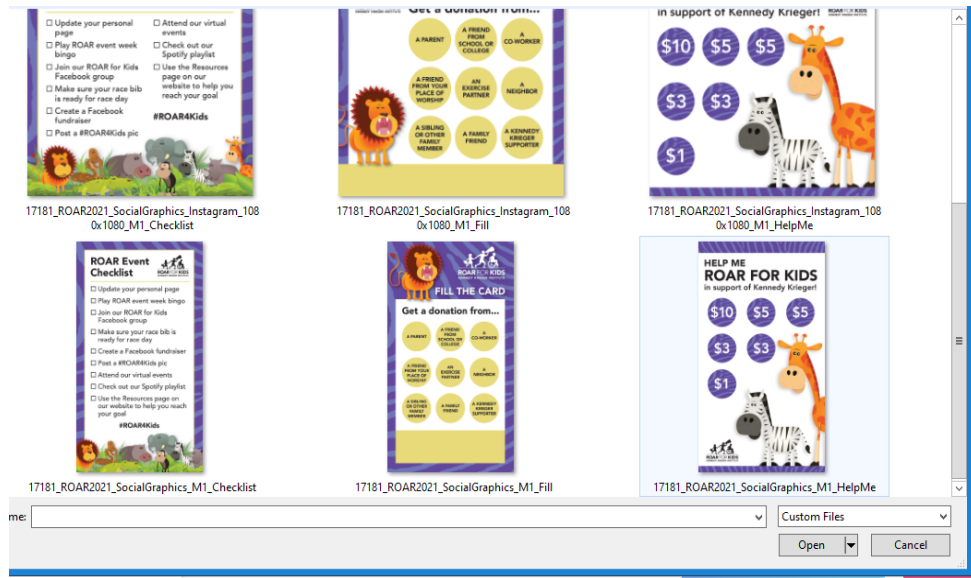

First, login to Facebook and click the Create Story button at the top of your homepage

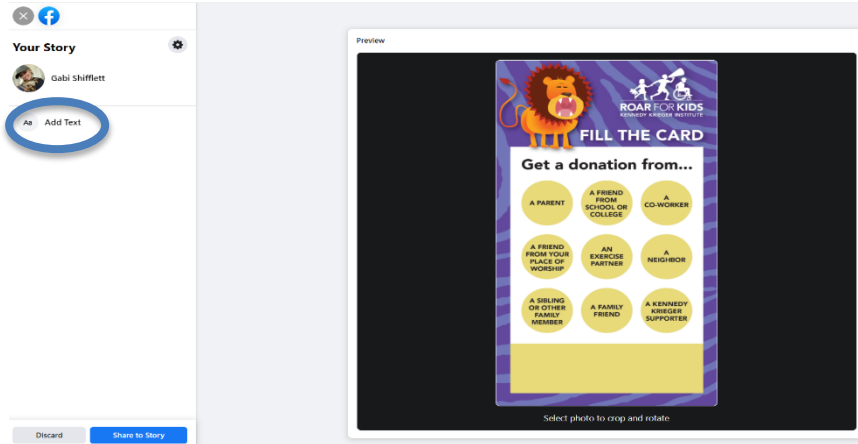

Next, click Create a Photo Story

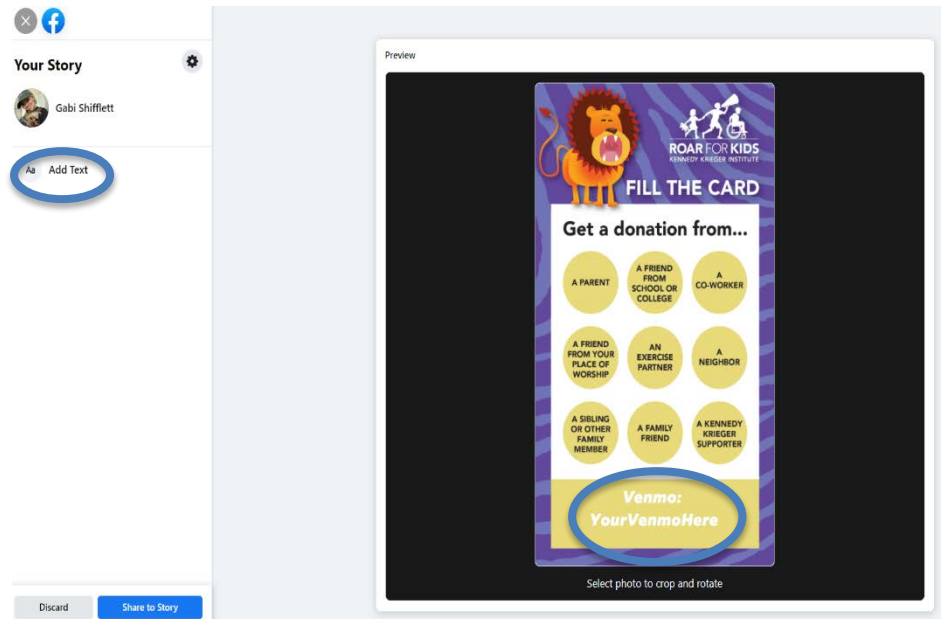

Then, choose which fun graphic you'd like to upload!

Next, click Add Text on the left side of your screen

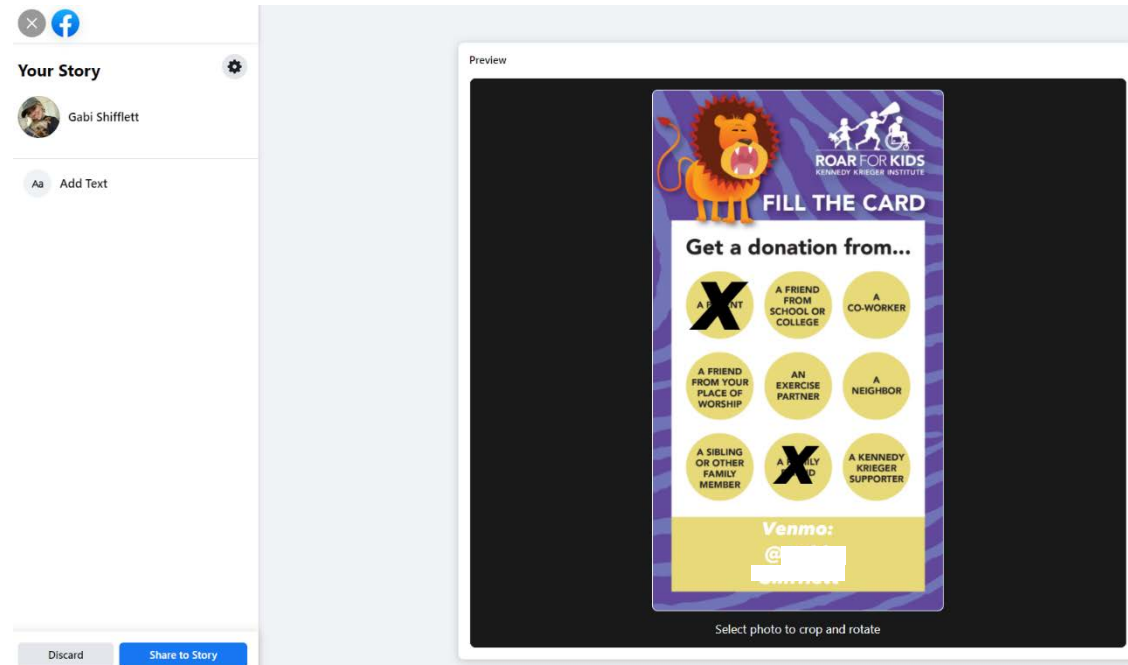

Then, use the text feature to add your Venmo, Paypal, etc. to your story! You can also make a post with your fundraising link encouraging people to donate there for a tax deductible donation!

Your story should look like this!

Now, let the donations roll in! As your friends and family donate, screenshot your story, and reupload it marking off the space using the story text feature we used above to mark each person who has donated:

Simply keep screenshotting and reuploading until your board is filled! If you used Venmo or Paypal, wait until your board is filled, move your donations over to your bank account, and make a personal donation to your page in honor of everyone that donated!

The same steps can be taken with our Event Checklist graphic as well, simply keep screenshotting and reuploading until you've completed your whole ROAR Event Checklist!
